

This car killed my dear son Valentin (5) with its extraordinary brutal front.

Powerful engines, high speed and perverted attributes (“Defender”, “Attack”) address masculine instincts and cost millions of lives.

The picture was taken at the spot of the incident.

The killing of my son happened in October 1997. Be sure this picture represents only one of hundreds happened only since then involving vulnerable children and horrible inhuman monster vehicles. Is it too much testosterone driving this industrial killing complex?

Rolf Strassfeld, bereaved father
