Hospital PROFILE

V 1.0 JAN 20

Addis Ababa Burn, Emergency & Trauma Hospital (**AaBET** Hospital) is an affiliate of St. Paul's Hospital Millennium Medical College and is inclusive of four major departments; Emergency Medicine and Critical Care, Plastic Reconstructive and Hand Surgery, Orthopedics & Traumatology, and Neurosurgery. AaBET Hospital is progressive and successfully managed upper-level teaching hospital with 190 and 190 bed-ward departments as well as center for traumatology, physiotherapy, and spinal disorders. Our facility is recognized as one of the largest government-based trauma & emergency center in the country.

Mission: AaBET is established with the purpose of providing patient centered quality care running innovative training programs and performing problem solving research in the areas of emergency, trauma and related fields to transform the care and training provided in these areas to a higher level.

Vision: AaBET works to become the Leading Center of Excellence in Emergency/Trauma Care, Training and Research.

Our Pledge

We, the staff of AaBET hospital, will treat with respect and humility all patients who come to our hospital seeking emergency care and beyond. We will do everything in our power to make sure our service users receive all the necessary care and treatment they need and deserve.

We are fully accountable to the services we offer. We will offer our services with full focused on the satisfaction of our patients who require our immediate medical attention.

We, at AaBET Hospital, will treat you as if you're a part of our big family.

Message from CEO

Welcome to AaBET Hospital and Thank you for taking the time to learn about our hospital.

Our focus is to provide quality and sustainable Emergency health care in a culture that

encourages teamwork and the use of advanced technologies/innovation, and community involvement.

Yonas Kefelegn M.D EMCC
CEO of AaBET Hospital

History

AaBET Hospital is a result of the fruitful quality improvement project to address the gap in the area of the burn, emergency service, neurosurgery and orthopedics which caused our country's WHO estimate of 25 per 100,000 populations to die from Road Traffic Accidents and multiple constructions.

AaBET started giving emergency medical service on Meskerem 2, 2008EC(September 12, 2015, EG) currently enshrining departments such as Emergency Medicine and Critical Care, Plastic Reconstructive and Hand Surgery, Orthopedics & Traumatology, and Neurosurgery. AaBET Hospital is a progressive and successfully managed upper-level teaching hospital with 190 bed-ward departments as well as a center for traumatology, physiotherapy & spinal disorders.

Where we are at now

Our facility is recognized as one of the largest government trauma centers in the country reaching over 12 million people. The establishment of this big emergency and trauma center in the country will be remembered as a great success for some time to come. With the ambition of sustaining the fruits of its inception, envisioning a center of excellence in emergency medicine and trauma care has significantly risen by involving the health workforce who are dedicated to being mindful of the purpose of the work they do and the contribution they give every day. Despite the multifaced difficulties of the country AcBET still continues to serve the large portion of Ethiopian population.

Our Core Values

Patient-Centeredness

Timeliness

Quality care

Team work

Ownership

Our Mission

AaBET is established with the purpose of providing patient centered quality care running innovative training programs and performing problem solving research in the areas of emergency, trauma and related fields to transform the care and training provided in these areas to a higher level.

Our Vision

AaBET works to become the Leading Center of Excellence in Emergency/Trauma Care, Training and Research.

Where we want to be

The Future holds a lot of change for the entirety of the hospital. That makes AaBET a hospital that meets the needs of our community and beyond and offers high quality emergency medical service as well as the first emergency dispatch center in the country. AaBET hospital is planning to build a number of new medical centers and campuses over the next ten years. The goals are better and more cohesive of patient treatment, improved patient safety, greater efficiency and higher quality and more comfortable academic and research center. To increase the patient satisfaction and service quality, the hospital has big dreams of expanding projects to create an up to standard & competitive healthcare institution.
