

VISION ZERO PLEDGE

Because streets are for people and too many people are dying on them, I say **YES** to safer streets!

- YES**, I want Denver to adopt modern street designs that anticipate human error and encourage slower speeds.
- YES**, I am willing to give up space on the street to increase safety and understand our streets need to be shared.
- YES**, I know that to get people around safely we have to make room for bus lanes and bike lanes and kids walking to school.
- YES**, I embrace the responsibility we all share to look out for each other's safety.

I say **YES** to safer streets!
